Cyberbond 9075 Cleaner cleans and degreases surfaces before bonding with UV adhesives. After curing of adhesive Cyberbond 9075 Cleaner removes non cured adhesive. Solvent has to evaporate completely before applying UV adhesive.

The data mentioned in this data sheet, particularly the recommendations for application and use of products are based on our recent knowledge and experience. Due to the fact of having so many different materials involved and conditions of applications which are out of our influence, we strongly recommend to do sufficient tests in order to guarantee that Cyberbond products are suitable for the intended process and applications. Except for wilful acts any liability based on such recommendations or any verbal advice is hereby expressly excluded.
