TECHNICAL DATA SHEET

CYBERBOND 9060

Remover of Cyanoacrylate Adhesives

Contents :

- 20 ml plastic bottle
- 500 ml plastic bottle

Selling unit:

- 20 pieces
- 1 piece

Chemical Base:

Higher molecular ester

Physical Data:

Density at 20 °C: 1,06 g/cm³

Flashpoint: 110 °C

Description:

Cyberbond 9060 dissolves and removes Cyanoacrylate Adhesives. From its chemical basis point of view Cyberbond 9060 is an organic ester. In contrast to traditional solvents Cyberbond 9060 is notable for its almost non combustibility (flashpoint 109°C). Cyberbond 9060 is especially suitable for:

- dissolving and removing Cyanoacrylate Adhesive,
- cleaning of dosing equipment with the advantage of avoiding to leave any condensation moisture inside the system. Cyberbond 9060 prevents possible pre-polymerisation within the dosing system,
- cleaning of dosing tips, tools etc. which have been in contact with Cyanoacrylate Adhesives.

The data mentioned in this data sheet, particularly the recommendations for application and use of products are based on our recent knowledge and experience. Due to the fact of having so many different materials involved and conditions of applications which are out of our influence, we strongly recommend to do sufficient tests in order to guarantee that Cyberbond products are suitable for the intended process and applications. Except for wilful acts any liability based on such recommendations or any verbal advice is hereby expressly excluded.
